Special (4) <ul style="list-style-type: none"> • Observation of surgical procedures • Chemotherapy delivery session • Symptom management/palliative care • Examination under anaesthesia for cervix cancer 	POE Sessions – 3 hrs duration (3) <ul style="list-style-type: none"> • Surgery (1) • Systemic Therapy (1) • Palliative Care (1) • Other (1)
Total = 5	Total = 4

If a trainee has completed 30 case reports the CRDT and Phase 2 POE requirements of the enhanced program are completed.

Trainees must have all their case reports completed by 31 January 2022, with the exception of the Radiation Therapy special case reports. Due to Covid-19 restrictions this year, these reports may be submitted up until 30 June 2022.

For example, a trainee who has completed 27 case reports by 31 January 2022, with three Radiation Therapy special case reports outstanding, will be considered to have completed all 30 case reports for Training Program 2022 credit purposes.

Trainees who do not submit the outstanding Radiation Therapy special case reports by 30 June 2022, will have this credit removed. As such, case reports completed prior to 31 January 2022 will be credited as per transition arrangements and trainees will need to complete the required number of Case Report Discussion Tools and also any Phase 2 Practical Oncology Experiences (POEs) which have not been credited by Clinical Oncology case reports.
