		completed, DoT sign off.				
<b>Research</b>		Research Project	Can be completed after the exam.	For the 1 <sup>st</sup> sitting in 2022, research completed before exam.	6 of 17 trainees have completed it already. For the 1 <sup>st</sup> sitting in 2022, research completed before exam.	Majority have completed research project.
<b>Portfolio Review for Fellowship</b>		Trainee Portfolio Review Committee	Yes.	Possibly, mini review for eligibility for Fellowship after 2 <sup>nd</sup> sitting 2022.	Possibly, mini review for eligibility for Fellowship after 2 <sup>nd</sup> sitting 2022.	Possibly, mini review for eligibility for Fellowship after 2 <sup>nd</sup> sitting 2022.

**\* If a trainee has completed 30 case reports the CRDT and Phase 2 POE requirements of the enhanced program are completed.**

Trainees must have all their case reports completed by 31 January 2022, with the exception of the Radiation Therapy special case reports. Due to Covid-19 restrictions this year, these reports may be submitted up until 30 June 2022.

For example, a trainee who has completed 27 case reports by 31 January 2022, with 3 Radiation Therapy special case reports outstanding, will be considered to have completed all 30 case reports for Training Program 2022 credit purposes.

Trainees who do not submit the outstanding Radiation Therapy special case reports by 30 June 2022, will have this credit removed. As such, case reports completed prior to 31 January 2022 will be credited as per transition arrangements and trainees will need to complete the required number of Case Report Discussion Tools and also any Phase 2 Practical Oncology Experiences (POEs) which have not been credited by Clinical Oncology case reports.
